### **DETAILED ACTION**

## Claim Rejections - 35 USC § 103

Claim: 1-4, 7-9, and 11-50 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent Application No. US 2002/0107820 (hereinafter 'Huxter'') in view of U.S. Patent Application No. US 2002/0072945 (hereinafter ("Yang").

Regarding claim 1, Huxter discloses a method for processing physical distribution information, said method comprising the steps of: receiving and registering schedule information regarding a form of receiving of a package addressed to a member from the member (see page 5, paragraph #106); receiving a shipment request from a sender of a package (#0183); determining a delivery form with reference to at least the receiver's schedule information registered in said receiving and registering step when said receiver is a member (see page 5, paragraph #116); when said delivery form determined in said determining step involves a movement of said package, generating delivery request information for a distributor in accordance with said delivery form (see page 5, paragraph #116); [claims 1, 17, 18, 34, 50] wherein the receiving and registering schedule information is carried out asynchronously with the determining and is carried out without relationship with a specific shipment request; [claim 2] when said delivery form determined in said determining step involves a movement of the package, registering scheduled delivery information in said receiver's schedule information (see page 5, paragraph #116); [claim 3] sending said distributor information regarding said delivery form determined in said determining step before starting to deliver said package (see page 5, paragraph #11); [claim 4] receiving a delivery completion notice

including receiving status data from said distributor (see page 2, paragraph #17); [claim 71 receiving and registering information regarding a fixed delivery charge from said distributor after said package is received by said distributor (see page 15, paragraphs #245-246); [claim 8] there is a case where said delivery form is determined as undeliverable in said determining step (see page 16, paragraph #256); [claim 9] including information regarding a determined as undeliverable in said sending said sender a deliverable date when said delivery determining step (it is inherent that the etailer will be notified when a package is undeliverable); [claim 11] said generating step, when said delivery form is determined as forwarding or keeping in said determining step, delivery request information addressed to said distributor is generated by using forwarding, destination information or keeping place information registered for said receiver in advance (see page 16, paragraph #255); [claim 12] receiving and registering information of specified member from said member, and wherein, in said determining step, when said receiver is not available for receiving and said specified member is registered for said receiver, said schedule information for said specified member is referenced (see page 16, paragraph #255); [claim 13] when a delivery request to a nonmember is received from a sender of a package, registering information of said nonmember included in said delivery request as provisional member information; sending a member registration request to said non-member; and sending information registered as said provisional member information to said non-member when membership registration is requested from said nonmember (see page 7, paragraph #148); [claim 14] wherein in said receiving and registering step, schedule information regarding a form of receiving

said package addressed to said member is received as a predetermined template selection instruction from said member (see page 5, paragraph #106)) [claim 15] wherein said determining step comprises a step of sending a schedule input request to said receiver when said receiver's schedule information indicates it is not fixed (see page 16, paragraph #255); and [claim 16] wherein said determining step comprises a step of sending said sender a notice indicating scheduling in progress (see page 5, paragraph 106).

Regarding **claim 17**, Huxter discloses a method for processing physical distribution request, said method comprising the steps of sending a central server (1000) a delivery request of a package, said delivery request specifying at least a receiver (400); and receiving a result notice of delivery scheduling including a case where it is indicated that said package is undeliverable, from said central server before starting to deliver said package (see page 16, paragraphs #255-256).

Huxter discloses a program, apparatus, and method as set forth in claims 18-50. Claims 18-50 are similar to previously addressed claims 1-4, 7-9, and 11-16.

Regarding claims 1, 17, 18, 34, and 50, Huxter fails to disclose the schedule information comprising at least one of the forms of receiving the package addressed to the member for each of a plurality of days within a predetermined period.

Yang teaches method of package delivery and pickup including schedule information comprising at least one of the forms of receiving the package addressed to the member for each of a plurality of days within a predetermined period (see page 4, paragraphs 0060-0062).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Huxter with schedule information related to a plurality of days as taught by Yang, because delivering items when the receiver is likely available to accept the items increases the efficiency of the delivery service, wherein decreasing the expense related to unsuccessful delivery attempts.

Claims 5, 6, and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Htlxter in view of Yang as applied to claims 1 and 4 above, and further in view of U.S. Patent Application No. US 2002/01268 13 (hereinafter "Partovi").

The combination of Huxter and Yang disclose all claimed elements as set forth above in paragraphs 3-4, but fail to explicitly disclose the use of giving the customer a reward for correct registration.

Partovi teaches the use of providing a reward for registering (see paragraph [0060]).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Huxter/Yang with a registration reward as taught by Partovi, because rewarding customers increases the likelihood that customers will do events desired by businesses.

## Response to Arguments

Applicant's arguments filed 4/21/2006 have been fully considered but they are not persuasive.

On page 12 of the "REMARKS", the applicant argues that neither Huxter nor Yang, individually or combined, teach the "receiving and registering schedule information" limitation of claim 1. Specifically, the applicant argues that in Huxter, the customer information fails to include any information regarding "availability status" prior to ordering goods. However, Huxter does teach REGISTERING <u>prior</u> to and <u>asynchronous to</u> ordering goods, the registering providing schedule information including email address, telephone numbers, home address, and a preferred Automated Collection Point (ACP) site (See #0179). The prior art, Yang, anticipates the limitations regarding the availability status for each of a plurality of days within a predetermined period (See #0060-0065). The combination of references, therefore, do anticipate the "receiving and registering schedule information" limitation of claim 1.

#### Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Application/Control Number: 09/961,345 Page 7

Art Unit: 3627

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to F. Ryan Zeender whose telephone number is (571) 272-6790. The examiner can normally be reached on Monday-Friday, 8am-5pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Alexander Kalinowski can be reached on (571) 272-6771. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
